

Upgrades

1. **Hardware:** All hardware was upgraded and aligned with the v6 standards.
 2. **Rope and Elastics:** All ropes and elastics replaced to ensure optimal performance and safety.
 3. **Retriever Systems:** New retriever systems, including runners and spi halyard were added for enhanced functionality.
 4. **Spinnaker Hoist System:** A spinnaker hoist system was installed from the cockpit for better control and convenience.
 5. **Diamonds Tuning System:** The diamonds tuning system were relocated from the lower part of the mast to underneath the floor for improved accessibility and performance.
 6. **Quick Release System and Runner Upgrade:** A quick release system and new runners were added, enhancing ease of use and performance.
 7. **Fiberglass and Gelcoat Repair:** A full repair was conducted on the fiberglass and gelcoat, including closure of the front hatch and addition of anti-slip features on the deck.
 8. **Interior Sea Deck:** The interior Sea Deck was replaced to resemble that of a new boat, enhancing aesthetics and comfort.
 9. **Mast:** A new eMast is included.
 10. **Trailer Service:** The trailer was fully serviced, including polishing of the boxes.
 11. **Rudder Tiller and Boom Support Painting:** The rudder tiller and boom support were painted to match, enhancing visual appeal and durability.
 12. **Electrical System Service:** Electrical system fully serviced, including the pumps, battery, and solar panel.
- Conclusion**

The upgrades made to this v5 bring it very close in terms of performance to the v6 and v6.1 models. Sailors will experience minimal differences in speed and handling after the upgrades, making the v5 a competitive choice.
